 Windows will then find the newly connected USB reader, and will open the wizard that adds new hardware to the system. Follow the on-screen directions to enable your computer to recognize the new USB reader as a hardware device.

11. Once the wizard finishes, you will continue with the USB reader installation program. The *1-Wire Net Port Selection* window allows for port setup. Click the **Auto-Detect** button. The software will find the reader.

12. When the reader is found, click on **Yes** to make the newly selected port the default connection for your USB reader.
