FOR IMMEDIATE RELEASE

SARGENT AND GREENLEAF'S NEW 2740B HIGH-SECURITY LOCK APPROVED BY U.S. GENERAL SERVICES ADMINISTRATION

Nicholasville, KY – (November 26, 2013) – Sargent and Greenleaf, Inc. (S&G) announces that its recently released 2740B Electromechanical Combination Lock, the “Bravo” version of S&G’s Model 2740 GSA container lock designed to meet Federal Specification FF-L-2740B, has been approved by the U.S. General Services Administration (GSA) and is included on the organization’s updated Qualified Product List (QPL) for government agencies and qualified contractors.

This approval confirms that S&G’s 2740B lock meets requirements for the latest federal specification detailing the locking hardware required to secure National Security Information (NSI).

The S&G 2740B lock integrates the latest design advances to produce an easy-to-operate electromechanical lock specifically engineered to secure GSA-approved security containers, and includes the following features:

- Familiar left-right-left dialing sequence combined with Direct-Dial technology for fast, easy access
- Twenty man-hours' resistance to expert manipulation
- Built-in thermal protection provided by an integral thermal relock component
- Simplified installation process significantly decreases installation time and reduces the likelihood of errors and damage to parts
- Change key for quick, easy combination changing is included with each lock
- Stainless steel lock bolt is strong enough to resist 600 lbs. of force
- Single user and dual control modes of operation are selectable and changeable at any time
- Lock case uses S&G's Magic Module™ footprint and .461-inch bolt throw for ease of retrofit on existing containers
- Internal batteries allow for a straightforward, robust lock design
- Lock cover is retained on the lock whenever the bolt is retracted

“The 2740B is the workhorse of GSA container protection, designed to be the easiest to install, set up and open, while also eliminating any security concerns regarding electronic cables outside the container,” said Mike Clark, Director of Government Engineering for S&G.

S&G will begin accepting orders for the 2740B immediately (p/n 2740-400), and customers can currently take advantage of ordering at their same price as the 2740A version. GSA will communicate future U.S. Government policy to the industry concerning any specific timeframe for transition to the locks conforming to FF-L-2740B.
