2740B

GSA Approved High-Security Lock

"Finally, there's an alternative to the foreign-owned competitor's locks. Bravo, S&G. Bravo!"

For nearly two decades, facilities security officers (FSOs) had been limited to only one GSA-approved, high-security combination lock that met the stringent lock mandates of Federal Specification FF-L-2740. But today, thanks to a team of innovative American engineers, there's a choice. The Sargent & Greenleaf Model 2740B has passed all the rigorous tests spelled out in Federal Specification FF-L-2740B, and has been placed on the Federal Qualified Products List (QPL), having been deemed appropriate for safes, security files, vault doors, and similar items; and intended for the protection of national security information.

By eliminating the need for cables outside the safe, the S&G 2740B represents a significant step forward in both innovation and security. Engineered and manufactured to meet the highest security standards of the U.S. Government, the S&G 2740B provides instant, reliable power up. And because the S&G 2740B is powered by common lithium power cells, with a projected life of 10+ years, you simply replace the batteries to extend the lock's life, rather than replace the entire mechanism. S&G will even provide the batteries for free. The result is both enhanced long-term security and lower cost of ownership.

2740B

Sargent & Greenleaf has set the bar for quality, value and technical innovation for over 150 years.

A domestic provider for domestic security. Located in Nicholasville, Kentucky, Sargent & Greenleaf (S&G), a subsidiary of Stanley Black & Decker, has been protecting the assets of banks, businesses and governments since 1857. As an American-owned company, we take great pride assisting U.S. Government agencies, the military, and their contractors in their efforts to protect classified materials and maintain the highest level of domestic security. The S&G 2740B has been designed to deliver the performance security officers demand.

- Meets Federal Specification FF-L-2740B
- **Five year warranty**—the longest in the industry
- GSA approved for use on new and existing GSA containers
- Easier installation: fewer parts, no delicate ribbon cables
- Enhanced security: the 2740B design eliminates electronics outside the container
- High reliability: precision motor and drivetrain technology
- Easy read: high contrast, bright white laser-etched dial number markings
- Instant power up
- Extra long-life power cell technology, with a projected battery life of 10+ years
- Spy-Proof® dial: delivers operator-only visibility
- Rugged construction: lock withstands 600 pounds of end and side load force
- Around-the-clock emergency technical support: 1 (866) 799-0081

Feature-for-feature, the S&G 2740B blends classic design and cutting edge technology to deliver outstanding performance!

	S&G Model 2740B
Power Source	Battery-powered, using commonly-available, long-lasting batteries
Power Generation	Powers up instantly
Installation	Simple: No external cables required
Company Ownership	American-owned
Display	Easy-to-read, high contrast, laser-etched numerals and index marks
Warning System	100+ low battery indications, plus available battery backup to power lock
Warranty	Five year warranty
Service	Backed by S&G 24/7 live service support
Specification Qualification	Style 2 meeting Fed Spec FF-L-2740B
GSA NSN	5340-01-613-2080
DLA NSN	5340-01-628-4750
